The fourth edition of this well-known text continues the mission of its predecessors – to help teachers link creativity research and theory to the everyday activities of classroom teaching. Part I includes information on models and theories of creativity, characteristics of creative people, and talent development. Part II includes strategies explicitly designed to teach creative thinking, to weave creative thinking into content area instruction, and to organize basic classroom activities (grouping, lesson planning, assessment, motivation and classroom organization) in ways that support students' creativity.

Do your students have difficulty understanding math terms?Remembering the steps of algorithms in sequence? Interpreting data in displays? Our math study skills program will help you teach them math and how to learn! Essential to the program is the comprehensive Teacher's Guide. It provides a focus on the importance of study skills, directions for using the student text, and practical suggestions for both the experienced and inexperienced teacher.

A guide to raising "Indigo" children discusses what makes their personalities so different; gives instruction on how to successfully nurture, manage, and discipline them; and provides information on forums and support groups for parents.

Misconceptions about the connection between creativity and giftedness are discussed, as well as how to nurture creativity in students.

As interest in creativity explodes, it has become more complicated to decide how to best nurture creativity in our schools. There are the controversial Common Core Standards in many states. Meanwhile, the classroom has become increasingly digital; it is easier to access information, communicate ideas, and learn from people across the world. Many countries now include cultivating creativity as a national educational policy recommendation, yet there is still debate over best practices. Indeed, many well-intentioned educators may institute programs that may not reach the desired outcome. The notion that schools 'kill creativity' has become a widespread social meme. We view such beliefs as both hyperbolic and problematic: they allow us to recognize there is a problem but not solve it. In this book, a wide array of international experts addresses these issues, discussing theories and research that focus on how to nurture creativity in K-12 and college-level classrooms.

Andrew Angel briefly reviews the work of Old Testament scholars on the mythological motif of God's battle with the dragon and the chaos waters. He also reviews works that touch on the existence of the motif in the period 515 BCE to 200 CE, noting the need for thorough survey of the motif in Hebrew literature of this period. There follows a study of forty-two Jewish and Christian texts (in Hebrew, Aramaic, Greek and Latin), which establishes the fact that this mythological motif was well known in this period. Angel makes suggestions as to how this might offer fresh insights into the meaning of apocalyptic visions and texts that appear to refer to a 'son of man' figure in this period.
