fluorescence and phosphorescence methods are being used about as widely in Russia as elsewhere in the world and that we must not overlook these important contributions.

Konev's studies on protein fluorescence have been widely

performance over the long term, but requires only a few minutes of your time each month?

Does it sound like a lot of hard work?

It's not - even the laziest investor can achieve it. The Idle Investor includes three

straightforward DIY strategies for long-

you have to do is  
follow the simple  
rules. Each method  
requires only a

reasons why the  
strategies work and  
everything else you  
need to know to

put them into practice is explained clearly, with numerous worked examples.

The three strategies are: 1.

The Bone Idle Strategy: Part of your portfolio is allocated to shares and part is allocated to bonds, with adjustments

to the portfolio are only required twice per year. The rest of the time you do nothing. 3. Multi-Asset Trending Strategy: A simple trend-following method determines whether to hold your portfolio in shares or bonds. For this strategy you will need to

your portfolio and making simple changes. The activity levels range from yearly rebalancing, for the laziest investor, through to monthly reallocation, for those who are more active. How much you do depends on how lazy you are
