Air Babylon does the same; only this time, it is all about airlines. Apparently, based on real events, but written in a fictional form, the events in the book occur over a 24 hour period. The book is a laugh riot from the start and might even tell you a thing or two about what airlines and their staff think of their passengers.

This volume is essential for every Assyriologist, Semitist, and interested layman, it contains about 13,000 Assyrian entries and about 23,000 English entries. Based on the Corpus of Neo-Assyrian text database and relying on the glossaries to previous SAA volumes, the Helsinki Assyrian Dictionary is, unlike other "Assyrian" dictionaries, actually a dictionary of Assyrian. Influence from Mesopotamia on adjacent civilizations has often been proposed on the basis of scattered similarities. For the first time a wide-ranging assessment from 3000 BC to the Middle Ages investigates how similarities arose in Egypt, Palestine, Anatolia, and Greece. The development of writing for accountancy, astronomy, divination, and belles lettres emanated from Mesopotamians who took their academic traditions into countries beyond their political control. Each country soon transformed what it received into its own, individual culture. When cuneiform writing disappeared, Babylonian cults and literature, now in Aramaic and Greek, flourished during the Roman Empire. The Manichaeans adapted the old traditions which then perished under persecution, but traces persist in Hermetic works, court narratives and romances, and in the Arabian Nights. When ancient Mesopotamia was rediscovered in the last century, British scholars were at the forefront of international research. Public excitement has been reflected in pictures and poems, films and fashion.

The present edition of the Introduction to Akkadian is fully revised, and supplied with indices to the Akkadian vocabularies and sign-lists, an English-Akkadian glossary, and a paradigm of the strong verbs. The Introduction is intended as a tool in offering a twelve lessons or one semester course in essential Akkadian grammar. The reading exercises in transliteration and in cuneiform are designed to introduce the student to common vocabulary and basic cuneiform signs. The exercises are chosen from Old Babylonian, but signs are introduced, as is customary, in their Neo-Assyrian form. In addition to the twelve lessons, there are appendices dealing with Akkadian phonetics and metrology, indices, and a paradigm of the strong verb.
