Studwell blows the lid off the supposed talents of Asia's super-rich godfathers by showing that making money is easy for monopolists, duopolists or cartel-conspirators. Personally I found the information on Singapore, Hong Kong and Indonesia the most interesting. Throughout, though, it's informative and hilarious.

Studwell tries to debunk what he regards as the myth of the SE Asian Horatio Alger-type tycoons, whose successes largely owe to political corruption and government protected cartels.

In this enlightening, searing attack, Studwell pegs Asia's ruling tycoons or "godfathers" as charming billionaire throwbacks who ruthlessly control business empires with the permission of corrupt, ever-shifting governments, prospering as the populace struggles.

It must have cost Joe Studwell a good deal of work to integrate his knowledge of Asian business and politics and produce this exceptional book. He has a facility for gaining access to Asia's rather secretive Chinese billionaires since they are obviously not in the habit of sitting around and sharing their fine French wine with any regular gweilo.

40 or 50 families control the economies of Hong Kong, Singapore, Thailand, the Philippines and Indonesia. Their interests range from banking to property, from shipping to sugar, from vice to gambling. 13 of the 50 richest families in the world are in South East Asia yet they are largely unknown outside confined business circles. Often this is because they control the press and television as well as everything else. How do they do it? What are their secrets? And is it good news or bad for the places where they operate? Joe Studwell explosively lifts the lid on a world of staggering secrecy and shows that the little most people know is almost entirely wrong.

Hong Kong and Southeast Asia are home to five hundred million people, yet their economies are dominated by only fifty families whose interests range from banking to real estate, shipping to sugar, gambling to lumber. At their peak, eight of the world's two dozen richest men were Southeast Asian, but their names would not be familiar to most regular readers of The Wall Street Journal. A complex mythology surrounds these billionaires, but in Asian Godfathers, Joe Studwell finds that the facts are even more remarkable than the myths. Studwell has spent fifteen years as a reporter in the region, and he marshals his unprecedented sources to paint intimate and revealing portraits of the men who control Southeast Asia. Studwell also provides us with a rich and deep understanding of the broader historic, economic, and political influences that have shaped Southeast Asia over the past 150 years. Asian Godfathers is a riveting and illuminating book that lifts the curtain on a world of staggering secrecy and hypocrisy, and reveals—for the first time—who the leaders of one of the planet's most important and tumultuous markets really are, why they got to the top, and how they keep themselves there.

"A good read for anyone who wants to understand what actually determines whether a developing economy will succeed" (Bill Gates, "Top 5 Books of the Year"). An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who The Financial Times said "should be named chief myth-buster for Asian business." In How Asia Works, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western

misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell's in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need "export discipline," a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron's stifling of reform to the explosive growth at a Korean steel mill. "Provocative . . . How Asia Works is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic." -The Economist

A freelance journalist in Asia and founding editor of China Economic Quarterly presents a detailed analysis of why the economies of some Asian countries have flourished while others have declined. 20,000 first printing.

When the British occupied the tiny island of Hong Kong during the First Opium War, the Chinese empire was well into its decline, while Great Britain was already in the second decade of its legendary "Imperial Century." From this collision of empires arose a city that continues to intrigue observers. Melding Chinese and Western influences, Hong Kong has long defied easy categorization. John M. Carroll's engrossing and accessible narrative explores the remarkable history of Hong Kong from the early 1800s through the post-1997 handover, when this former colony became a Special Administrative Region of the People's Republic of China. The book explores Hong Kong as a place with a unique identity, yet also a crossroads where Chinese history, British colonial history, and world history intersect. Carroll concludes by exploring the legacies of colonial rule, the consequences of Hong Kong's reintegration with China, and significant developments and challenges since 1997.

International Bestseller One of Foreign Policy's "21 Books to Read in 2012" A Publishers Weekly Top 10 Business Book "The best book on global economic trends I've read in a while."-Fareed Zakaria, CNN GPS To identify the economic stars of the future we should abandon the habit of extrapolating from the recent past and lumping wildly diverse countries together. We need to remember that sustained economic success is a rare phenomenon. After years of rapid growth, the most celebrated emerging markets-Brazil, Russia, India, and China-are about to slow down. Which countries will rise to challenge them? In his best-selling book, writer and investor Ruchir Sharma identifies which countries are most likely to leap ahead and why, drawing insights from time spent on the ground and detailed demographic, political, and

economic analysis. With a new chapter on America's future economic prospects, Breakout Nations offers a captivating picture of the shifting balance of global economic power among emerging nations and the West.

'Reads like a thriller you can't put down' - Megha Rajagopalan, China Bureau Chief, BuzzFeed News 'ensures you'll never think about Southeast Asia in the same way ever again.' - Geographical Magazine Essential to understanding Southeast Asia in the 21st century, Hello, Shadowlands reveals a booming underworld of organised crime across a region in flux- a \$100 billion trade that deals in narcotics, animals and people -and the staggering human toll that is being steadily ignored by the West. From Myanmar's anarchic hills to the swamplands of Vietnam, jihadis are being pitted against brothel workers, pet thieves against vigilantes and meth barons against Christian vice squads. Hello, Shadowlands takes a deep plunge into crime rings both large and small. It also examines how China's rise and America's decline is creating new opportunities for transnational syndicates to thrive. Focusing on human stories on both sides of this crime wave, the acclaimed Bangkok-based broadcaster and journalist Patrick Winn intimately profiles the men and women of the region who are forced to make agonizing choices in the absence of law.
