Also a local TV serviceman found this problem when he was given one of these branded TV's to repair and when he gave the serial number to the Service centre, he was told that 'Its not one of ours'

This project draws together the diverse strands of the debate regarding disability in a way never before combined in a single volume. After providing a representative sampling of competing philosophical approaches to the conceptualization of disability as such, the volume goes on to address such themes as the complex interplay between disability and quality of life, questions of social justice as it relates to disability, and the personal dimensions of the disability experience. By explicitly locating the discussion of various applied ethical questions within the broader theoretical context of how disability is best conceptualized, the volume seeks to bridge the gap between abstract philosophical musings about the nature of disease, illness and disability found in much of the philosophy of medicine literature, on the one hand, and the comparatively concrete but less philosophical discourse frequently encountered in much of the disability studies literature. It also critically examines various claims advanced by disability advocates, as well as those of their critics. In bringing together leading scholars in the fields of moral theory, bioethics, and disability studies, this volume makes a unique contribution to the scholarly literature, while also offering a valuable resource to instructors and students interested in a text that critically examines and assesses various approaches to some of the most vexing problems in contemporary social and political philosophy.

Tackles the challenge of dismantling the multicultural model without destroying diversity in European society* Have Europeans become hostile to multiculturalism? * And are right-wing extremists becoming the storm troopers of the struggle against diversity?In recent years, European political leaders from Angela Merkel to David Cameron have discarded the term 'multiculturalism' and now express scepticism, criticism and even hostility towards multicultural ways of organising their societies. Yet they are unprepared to reverse the diversity existing in their states. These contradictory choices have different political consequences in the countries examined in this book. The future of European liberalism is being played out as multicultural notions of belonging, inclusion, tolerance and the national home are brought into question.

The brilliantly tense play that became Hitchcock's masterpiece, starring James Stewart. Believing themselves to be intellectually superior to their contemporaries, flatmates Brandon and Philip murder their friend David Kentley purely to see if they can get away with it. They then throw a cocktail party, serving food from the top of the trunk where they have hidden David's body. Their guests include both David's father and fiancée, as well as college lecturer Rupert Cadell, who becomes increasingly suspicious as the evening wears on.
