Anna Karenina, begun in 1875 and finished two years later, shares with War and Peace the distinction of being the most widely read among Russian novels. The story of beautiful Anna, her dull marriage, her adulterous and destructive passion, set against the vividness of contemporary Russian life, makes this epic novel an unforgettable one.

Exploring language, culture and education among immigrants in the United States, this volume discusses the range of experiences in raising children with more than one language in major ethno-linguistic groups in New York. Research and practice from the fields of speech-language pathology, bilingual education, and public health in immigrant families are brought together to provide guidance for speech-language pathologists in differentiating language disorders from language variation, and for parents on how to raise their children with more than one language. Commonalities among dissimilar groups, such as Chinese, Korean, and Hispanic immigrants are analyzed, as well as the language needs of Arab-Americans, the home literacy practices of immigrant parents who speak Mixteco and Spanish, and the crucial role of teachers in bridging immigrants' classroom and home contexts. These studies shed new light on much-needed policy reforms to improve the involvement of culturally and linguistically diverse families in decisions affecting their children's education.

The uses and practices of sign languages are strongly related to scientific research on sign languages and vice versa. Conversely, sign linguistics cannot be separated from Deaf community practices, including practices in education and interpretation. Therefore, the current volume brings together work on sign language interpreting, the use of spoken and sign language with deaf children with cochlear implants and early language development in children exposed to both a spoken and sign language, and reports on recent research on aspects of sign language structure. It also includes papers addressing methodological issues in sign language research. The book presents papers by "more seasoned" researchers and "new kids on the block", as well as papers in which the two collaborate. The contributions will be of interest to all those interested in linguistics, sociolinguistics, cultural studies, interpreting and education. It will have particular relevance to those interested in sign linguistics, sociolinguistics of deaf communities, Deaf studies, Deaf culture, sign language

bilingualism. Given the scarcity of literature on "Deaf studies", the book will also appeal widely beyond the traditional academic milieu. As a result, it has relevance for those teaching and learning sign languages, for professional and student interpreters and for teachers of the deaf.
