Easy to use, and adopted by many successful traders over the years, William Dunnigan's One-Way Formula for Trading in Stocks and Commodities is a robust and reliable mechanical approach to buy/sell decision-making in speculative markets. A rare example of a 'universal' formula, this technique can be applied to almost any stock or commodity market, and requires little more than accurate line and bar charts. To understand the union of these two books, we have to understand the author's ambition to develop a complete trading system which gave exact buy/sell signals for stocks or commodities, which was mechanical in all its applications, and which didn't require the user to make any mental decisions. In *New Blueprints for Gains in Stocks and Grains* the author explores and introduces a full range of technical principles and lays the essential analytical groundwork for this universal formula.

Blueprints for the Eagle, Star, and Independent: Revised 2nd Edition traces the formation of the ideologies of the modern Republican and Democratic parties through the actions and policies of their political leaders, starting from Theodore Roosevelt and Woodrow Wilson, up to Barack Obama and John Boehner. The need for a strong Independent party is made, one whose constitutionally based platform and general beliefs would center around □common sense solutions for the common good□ and be ably led by today's truly independent leaders. This book provides a factual account of the derivation of the political ideologies of the two major American political parties, and how the influence of key leaders and events shaped their policies. A substantial amount of effort is made to describe what an Independent party must stand for in order to compete with the two major parties on equal ground.
