This book compiles the latest findings in the field of marine and brackishwater aquaculture. It covers significant topics such as

Download File PDF

Brackishwater Aquaculture

techniques of culture of live feeds (microalgae, rotifer, Artemia, marine copepod & polychaetes), while also highlighting vital themes like the culture and applications of free and marine sponge

Download File PDF

Brackishwater Aquaculture

associated microbial probiotics, controlled breeding, seed production and culture of commercially important fin and shell fishes. Moreover, the book focuses on the breeding and culture of marine ornamental

Download File PDF

Brackishwater Aquaculture

fishes, sea cucumber and sea urchin and discusses seaweeds culture, aqua feed formulation and nutrition, water quality management in hatchery and grow-out culture systems, fish disease diagnosis and health

Download File PDF

Brackishwater Aquaculture

management and cryopreservation of fish gametes for sustainable aquaculture practices, all from a multidimensional perspective. The global fish production was 154 million tonnes in 2011 which more or

Download File PDF

Brackishwater Aquaculture

less consisted of capture and culture fisheries (FAO, 2012). Roughly 80% of this is from inland-freshwater aquaculture and the remainder from capture fisheries in the marine and brackishwater sector.

Download File PDF

Brackishwater Aquaculture

However, marine and brackishwater catches have recently begun to diminish due to overexploitation, climate change and pollution. The UNEP report affirmed that if the world remains on its current

Download File PDF

Brackishwater Aquaculture

course of overfishing, by 2050, the ocean fish stock could become extinct or no longer commercially viable to exploit. In these circumstances, aquaculture is considered to be a promising sector to fulfill

Download File PDF

Brackishwater Aquaculture

our future protein requirement. However, brackishwater and marine fish production now face serious challenges due to e.g. lack of quality fish seeds, feeds, poor water quality management and

Download File PDF

Brackishwater Aquaculture

diseases. Fisheries and aquaculture sectors play a vital role as potential sources of nutritional security and food safety around the globe. Fish food is rich in protein, vitamins, phosphorous,

Download File PDF

Brackishwater Aquaculture

calcium, zinc, selenium etc.

In addition, fish contains omega-3 fatty acids, which help to prevent

cardiovascular diseases.

Fish food can also provide several health benefits to consumers. The omega 3 fatty

Download File PDF

Brackishwater Aquaculture

acids found in fish can reduce the levels of LDL cholesterol (the “bad” cholesterol) and increase the HDL levels (the “good” cholesterol). Research conducted in Australia has proved that fish consumption

Download File PDF

Brackishwater Aquaculture

can be used to cure hypertension and obesity. It is also reported that people who ate more fish were less prone to asthma and were able to breathe more easily. Omega 3 fish oil or fish consumption can help to

Download File PDF

Brackishwater Aquaculture

prevent three of the most common forms of cancer: breast cancer, colon and prostate cancer. The omega 3 fatty acids present in fish or fish oil induce faster hair growth and prevent hair loss. Since most varieties

Download File PDF

Brackishwater Aquaculture

of fish are rich in protein, eating fish helps to keep hair healthy. Furthermore, fish or fish oil helps in improving the condition of dry skin, giving it a healthy glow. It is useful in treating various skin

Download File PDF

Brackishwater Aquaculture

problems such as eczema, psoriasis, itching, redness of skin, skin lesions and rashes. It is well known that eating fish improves vision and prevents Alzheimer's and type-2 diabetes, and can combat

Download File PDF

Brackishwater Aquaculture

arthritis. Further, fish oil or fish is good for pregnant women, as the DHA present in it helps in the development of the baby's eyes and brain. It helps to avoid premature births, low birth weights and miscarriages. In

Download File PDF

Brackishwater Aquaculture

addition, it is widely known that fish can be a good substitute for pulses in cereal-based diets for the poor. The global fish production was roughly 154 million tonnes in 2011 (FAO, 2012). It is estimated that

Download File PDF

Brackishwater Aquaculture

by 2020 global fish requirements will be over 200 million tonnes; as such, innovative technological improvements are called for in order to improve the production and productivity in fisheries. In this

Download File PDF

Brackishwater Aquaculture

context, this book provides valuable information for academics, scientists, researchers, government officials and farmers on innovative technological advances for sustainable fish production using

Download File PDF

Brackishwater Aquaculture

aquaculture methods. The book identifies the main issues and trends in marine and brackishwater aquaculture from a global perspective in general and in the Indian context in particular. It includes 23

Download File PDF

Brackishwater Aquaculture

chapters written by prominent researchers from various institutes and universities across India, who address the latest aquaculture technologies with distinctive approaches to support academics,

Download File PDF

Brackishwater Aquaculture

researchers and graduates in the fields of Fisheries, Aquaculture, Marine Science, Marine Biology, Marine Biotechnology, Zoology and Agricultural Sciences. Our thanks go to our contributors; we are

Download File PDF

Brackishwater Aquaculture

confident that all readers will immensely benefit from their valued expertise in the field of marine and brackishwater aquaculture.

Download File PDF Brackishwater Aquaculture

Aquaculture is developing,
expanding and intensifying
in almost all regions of the
world, except in sub-Saharan

Download File PDF

Brackishwater Aquaculture

Africa. Although the sector appears to be capable of meeting the gap between future demand and supply for aquatic food, there are many constraints and challenges which must be addressed in order to at least maintain

Download File PDF

Brackishwater Aquaculture

the present level of per capita consumption at the global level. Key issues are the need for enhanced enforcement of regulation and better governance of the sector, as well as greater producer participation in

Download File PDF

Brackishwater Aquaculture

the decision-making and regulation process. This publication examines past trends in aquaculture development as well as the current global status, drawing on a number of national and regional

Download File PDF Brackishwater Aquaculture reviews.

This book explores the
Sundarbans eco-region from a
Page 78/98

Download File PDF

Brackishwater Aquaculture

trans-boundary perspective, examining the cross-country interaction that helps planners to develop more efficient coastal zone planning for the delta. The dynamic ecosystem of the Sundarbans is considered the

Download File PDF

Brackishwater Aquaculture

largest coastal delta in the world. It is located in the Bay of Bengal and spans across Bangladesh and West Bengal (India). Featuring chapters by experts from a range of fields, it addresses (i) risk factor

Download File PDF

Brackishwater Aquaculture

analyses, and the geohydrological, climatic, natural, socio-economic, and anthropological factors related to the Sundarbans; (ii) strategies for sustainability in natural resource management in trans-

Download File PDF

Brackishwater Aquaculture

boundary Sundarbans, cutting across political boundaries; (iii) improved agriculture, fisheries, and forestry practices and their impacts on the socio-economy for livelihood security; and (iv) a future road map for

Download File PDF

Brackishwater Aquaculture

improvements. This book will be of value to those working in academia, as well as to experts and professionals in coastal zone planning and management.
