Coworking spaces are large, open-plan offices where you can drop by and simply sit down at a desk and work. You share the space with others and most feature communal areas such as kitchens, breakout spaces and meeting rooms. Coworking spaces are typically sold as memberships where you pay for monthly or annual use.

While the economy has boomed since the Great Recession, so too have real estate rents and gentrification in cities across North America; nonprofits priced out of formerly affordable neighborhoods lack adequate workplaces to meet their missions. Shared Space and the New Nonprofit Workplace presents a comprehensive overview of shared space as an innovative model and effective long-term solution for nonprofit organizations' need for stable and affordable office and program space. In particular, it focuses on co-locating multiple nonprofits in shared spaces, often called nonprofit centers, with shared services and a collaborative culture. This comprehensive resource provides a practical road map to develop new workspaces; documents benefits for nonprofit staff, organizations, and their communities; presents challenges and solutions from successful nonprofit shared spaces; and considers nonprofit centers' history and future trends. Further, it offers nonprofits an opportunity to engage in forward-thinking practices, such as collaborative service delivery, green

The Routledge Companion to Rural Planning provides a critical account and state of the art review of rural planning in the early years of the twenty-first century. Looking across different international experiences – from Europe, North America and Australasia to the transition and emerging economies, including BRIC and former communist states – it aims to develop new conceptual propositions and theoretical insights, supported by detailed case studies and reviews of available data. The Companion gives coverage to emerging topics in the field and seeks to position rural planning in the broader context of global challenges: climate change, the loss of biodiversity, food and energy security, and low carbon futures. It also looks at old, established questions in new ways: at social and spatial justice, place shaping, economic development, and environmental and landscape

management. Planning in the twenty-first century must grapple not only with the challenges presented by cities and urban concentration, but also grasp the opportunities — and understand the risks — arising from rural change and restructuring. Rural areas are diverse and dynamic. This Companion attempts to capture and analyse at least some of this diversity, fostering a dialogue on likely and possible rural futures between a global community of rural planning researchers. Primarily intended for scholars and graduate students across a range of disciplines, such as planning, rural geography, rural sociology, agricultural studies, development studies, environmental studies and countryside management, this book will prove to be an invaluable and up-to-date resource.
