In Syria and the Middle East Peace Process, Alasdair Drysdale and Raymond A. Hinnebusch, two noted Middle East scholars, present the first detailed examination of Syria's role in the long struggle for an Arab-Israeli peace. They paint a surprising portrait of a county whose power is out of proportion to its size, economy, and resources. They explore the reasons behind this phenomeno most importantly, the Machiavellian brilliance of its leader, Hafez al-Asad. The authors address the origins of the Asad regime, Syrias strategy toward its Arab neighbors, its conflict with Israel, and the history of its relationships with the Soviet Union and the United States. The authors argue forcefully that Syrian involvement is vital in an effort to resolve the Arab-Israeli conflict.

A long list of countries - labelled outcasts, pariahs and rogues - have failed to meet international standards of good conduct. In the Cold War years Rhodesia, Israel, Chile, Taiwan and South Africa, among others, featured among the ranks of the disreputable. In modern

world politics, the serious sinners not only include states: terrorists, rebels, criminals and mercenaries also participate in the great game of who gets what, when and how. Highlighting the rules of good behaviour that both state and non-state actors have violated, Goldenhuys takes a novel approach that breaks through the narrow parameters of the rogue state paradigm and of other state-centric perspectives.

This fascinating area study of a major Middle East country in turmoil examines Syria's unusual interventionist role in the Lebanese Civil War as Syria shifted allegiance from the rebels to the Lebanese incumbents.

Few studies of Middle East wars go beyond a narrative of events and most tend to impose on this subject the rigid scheme of superpower competition. The Gulf War of 1991, however, challenges this view of the Middle East as an extension of the global conflict. The failure of the accord of both superpowers to avoid war even once regional superpower competition in the Middle East had ceased must give rise to the question: Do regional conflicts have their own dynamic? Working from this assumption, the book examines local-regional constraints of Middle East conflict and how, through escalation and the involvement of extra-regional powers, such conflicts acquire an international dimension. The theory of a regional subsystem is employed as a framework for conceptualising this interplay between regional and international factors in Tibi's examination of the Middle East wars in the period 1967-91. Tibi also provides an outlook into the future of conflict in the Middle East in the aftermath of the most recent Gulf War.

The internal destabilization of many poor countries that accompanied the end of the Cold War and the general failure of structural adjustment programs have changed the nature and allotment of foreign aid around the world. Major donors of foreign aid such as the United States, Japan, and the European Union have been shifting their geographical priorities in allocating aid, as well as their project emphasis, since the end of the Cold War. In addition, multilateral aid agencies—the World Bank, the United Nations, and the International Monetary Fund—are attempting to redress past failures of aid and revamp policies and priorities. Moreover, aid recipients in Africa, the Middle East, Asia, Eastern Europe, the former Soviet republics, and Central America are establishing priorities of their own and evaluating the success and failure of past aid programs. This volume stands out in the literature on foreign aid because it includes contributions from eight policy representatives from a range of important donor and recipient countries—the United States, Japan, the Netherlands, Bolivia, Egypt, Bangladesh, El Salvador, and Poland. Timely in its assessment of the crisis and the transition in the foreign aid regime, the book provides a view from inside the policy process and imparts a researcher's perspective on the changing priorities for donors and recipients. The wide-ranging essay—most previously unpublished—aim to shed light on the changing political, economic, and regional geographies of aid at the end of the twentieth century.

This book examines regime stability and political change in the heartland of the Middle East. It discusses the distribution of power within each regime of the Middle East; the sources of regime legitimacy; and the social, economic, and ideological trends influencing change in the region.

This timely study examines the forces at play in one of the world's most explosive nations, helping readers understand why Syria's popular uprising has been the most violent and hard-fought in the Middle East.

Rejecting conventional explanations for Syrian foreign policy, which emphasize the personalities and attitudes of leaders, cultural factors peculiar to Arab societies, or the machinations of the great powers, Fred H. Lawson describes key shifts in Damascus's response to regional adversaries in terms of changes in the intensity of political struggles at home. Periodic eruptions of domestic conflict have inspired Syria's ruling coalition to adopt a wide range of programs designed to buy off domestic rivals and perpetuate the predominance of individual coalition members. These programs have undermined the unity of the Ba'thi regime, increasing the chances that opponents will overturn the established order. Challenges to the Ba'thi regime become most threatening whenever crises of accumulation shake the domestic political economy, Lawson contends. Opposition forces gain strength when the state cannot sustain new investment or when competition increases between public and private enterprises. Political and economic trends inside Syria have determined why Damascus has since 1963 alternately escalated tensions with regional rivals and adopted more

accommodating postures. Lawson traces this dynamic through five major episodes: the 1967 war with Israel; limited intervention in Jordan in 1970; the widening conflict in Lebanon in 1976; the defusing of conflict with Iraq in 1982; and the rapprochement with Turkey over Kurdish separatism in 1994. These patterns, Lawson suggests, may be characteristic of nations changing from one domestic economic system to a radically different one, as Syria has in the transition from state socialism to a privatized political economy.
