Our Story - Center for Play Therapy | Center for Play Therapy

6 quotes from Garry L. Landreth: 'I am not all knowing. Therefore, I will not even attempt to be. I need to be loved. Therefore, I will be open to loving children. I want to be more accepting of the child in me. Therefore, I will with wonder and awe allow children to illuminate my world. I know so little about the complex intricacies of childhood.

"Play Therapy: The Art of the Relationship is a text for graduate-level counseling students in play therapy courses. It provides comprehensive and detailed information for creating therapeutic relationships with children and facilitating the play therapy process. Landreth stresses the importance of understanding the child's world and perspective, allowing play therapists to fully connect with them. Although there is this emphasis on the experiential aspect, the relevant research and theory are still considered. The author presents descriptions of play and the history of play therapy, child and therapist characteristics, play room set-up and materials, working with parents. Guidelines, transcripts, and case examples are provided for governing sensitive issues at every stage of the therapeutic process, from the first meeting to the end of the relationship. This new edition will incorporate the relevant research that has taken place since the publication of the previous, and includes new sections on supervision of play therapists, legal and ethical issues, and multicultural considerations in play therapy"--

This DVD is a perfect complement to Play Therapy: The Art of the Relationship, giving students, instructors, supervisors and practitioners visual reinforcement of the materials presented in the text. It shows a complete unrehearsed play therapy session, featuring Gary Landreth as he works with a young girl in a fully equipped play therapy room-- Container.

This manual is the highly recommended companion to CPRT: A 10-Session Filial Therapy Model. Accompanied by a CD-Rom of training materials, which allows for ease of reproduction and enhanced usability, the workbook will help the facilitator of the filial training and will provide a much needed educational outline to allow filial therapists to pass their knowledge on to parents. The Treatment Manual provides a comprehensive outline and detailed guidelines for each of the ten sessions, facilitating the training process for both the parents and the therapist. The book contains a designed structure for the therapy training described in the book, with child-centered play therapy principles and skills, such as reflective listening, recognizing and responding to children's feelings, therapeutic limit setting, building children's self-esteem, and structuring required weekly play sessions with their children using a special kit of selected toys. Bratton and her co-authors recommend teaching aids, course materials, and activities for each session, as well as worksheets for parents to complete between sessions. By using this workbook and CD-Rom to accompany the CPRT book, filial therapy leaders will have a complete package for use in training parents to act as therapeutic agents with their own children. They provide the therapist with a complete package for training parents to act as therapeutic agents with their own children.

This is an easy-to-use reference to the most effective play therapy techniques and their substantiated results. Play therapy is not an approach based on guess, trial and error, or whims of the therapist at the moment. It is a well-thought-out, philosophically conceived, developmentally based, and research-supported method of helping children cope with and overcome the problems they experience in the process of living their lives. Concise digests of play therapy procedures explore the most difficult, as well as the most common problems encountered by play therapists. These digests cover play therapy approaches based on a variety of theoretical positions for dealing with a broad range of specific problems. Because they often do not have access to substantiated results, play therapists sometimes doubt themselves and the effectiveness of their work. This book, an invaluable resource, puts an end to such questioning.

This book is unique in exploring the process of conducting short-term intensive group play therapy and the subsequent results. It focuses on play therapy with special populations of aggressive acting-out children, autistic children, chronically ill children, traumatized children, selective mute children, disassociative identity disorder adults with child alters, and the elderly. The book addresses such vital issues as: * How play therapy helps children * Confidentiality in working with children * How to work with parents * What the play therapist needs to know about medications for children The difficult dimension of diagnosis is clarified through specific descriptions of how the play therapist can use play behaviors to diagnose physical abuse, sexual abuse, and emotional maladjustment in children.

This book teaches parents how to conduct play therapy with their own young children. Teaching parents to be play therapists enhances the efforts of the mental health professional, who now becomes a consultant to the parent-therapist.

Child-Parent Relationship Therapy (CPRT), grounded in the attitudes and principles of Child-Centered Play Therapy (CCPT), is based on the belief that a parent acting as an agent for change in place of a play therapist has potential for significant and

lasting therapeutic gains. This newly expanded and revised edition of Child-Parent Relationship Therapy (CPRT) describes training objectives, essential skills and concepts taught in each session, as well as the format for supervising parents' play sessions. Transcripts of actual sessions demonstrate process and content in the 10 CPRT training sessions. Research demonstrating the effectiveness of CPRT on child and parent outcomes is presented in support of CPRT's designation as an evidence-based treatment model. This second edition is updated to include six new chapters exploring the topics of cultural considerations for working with ethnically and racially diverse families, neuroscience support for CPRT, and adaptations for specific populations including parents of toddlers, parents of preadolescents, adoptive families, and the teacher/student relationship. The authors' expertise and experience results in a book that is essential reading for both students and professionals. By using this text and the accompanying treatment manual, filial therapists will have a complete package for training parents in the CPRT model.

The fourth edition of this well-respected text, first published in 1979, is a timely and thorough revision of the existing material. Group Counseling has done well over the years, due in large part to its comprehensive history of group work as a counseling specialty, the practical nature of the authors' explanations, the diversity of sources the authors draw upon, and the international acclaim of Dr. Landreth's work on play and filial therapy. This text will provide both novice and experienced counselors with a framework from which to expand their group counseling skills and knowledge.

This resource is designed for practitioners, students, and play therapy supervisors. It describes the fundamental skills of building a therapeutic relationship by providing written exercises, case study examples with correct and incorrect dialogue interactions, and video review and reflection exercises.
