Covers cutting-edge techniques for small and large businesses alike. Author is an in-demand consultant with strong media connections.

Documenting theatrical and stage events under the often dramatic lighting designed for the production provides a number of specific photographic challenges, and is unlike most every other branch of photography. Theatre & Stage Photography provides an overview of basic photography as it applies to "available-light" situations, and will move both basic and experienced photographers through the process of accurately capturing both the production process and the resultant performance.

The first edition of 3D Laser Scanning for Heritage was published in 2007 and originated from the Heritage3D project that in 2006 considered the development of professional guidance for laser scanning in archaeology and architecture. Publication of the second edition in 2011 continued the aims of the original document in providing updated guidance on the use of three-dimensional (3D) laser scanning across the heritage sector. By reflecting on the technological advances made since 2011, such as the speed, resolution, mobility and portability of modern laser scanning systems and their integration with other sensor solutions, the guidance presented in this third edition should assist archaeologists, conservators and other cultural heritage professionals unfamiliar with the approach in making the best possible use of this now highly developed technique.
