Written to commemorate 30 years since the United Nations Convention on the Rights of the Child (UNCRC), *The Routledge International Handbook of Young Children's Rights* reflects upon the status of children aged 0–8 years around the world, whether they are respected or neglected, and how we may move forward. With contributions from international experts and emerging authorities on children's rights, Murray, Blue Swadener and Smith have produced this highly significant textbook on young children's rights globally. Containing sections on policy, along with rights to protection, provision and participation for young children, this book combines discussions of children's rights and early childhood development, and investigates the crucial yet frequently overlooked link between the two. The authors examine how policy, practice and research could be utilised to address the barriers to universal respect for children, to create a safer and more enriching world for them to live and flourish in. *The Routledge International Handbook of Young Children's Rights* is an essential resource for students and academics in early childhood education, social work and paediatrics, as well as
