Our linguistic ancestors had used the wheel, were settled arable farmers, kept sheep and cattle, brewed beer, got married, made weapons, and had at least 27 verbs for the expression of strife. The subjects to which the authors devote chapters include fauna, flora, family and kinship, clothing and textiles, food and drink, space and time, emotions, mythology, religion, and the continuing quest to discover the Proto-Indo-European homeland."

Ancient Mesopotamia was a rich, varied and highly complex culture whose achievements included the invention of writing and the development of sophisticated urban society. This book offers an introductory guide to the beliefs and customs of the ancient Mesopotamians, as revealed in their art and their writings between about 3000 B.C. and the advent of the Christian era. Gods, goddesses, demons, monsters, magic, myths, religious symbolism, ritual, and the spiritual world are all discussed in alphabetical entries ranging from short accounts to extended essays. Names are given in both their Sumerian and Akkadian forms, and all entries are fully cross-referenced. A useful introduction provides historical and geographical background and describes the sources of our knowledge about the religion, mythology and magic of "the cradle of civilisation".

How the theoretical tools of literacy help us understand programming in its historical, social and conceptual contexts. The message from educators, the tech community, and even politicians is clear: everyone should learn to code. To emphasize the universality and importance of computer programming, promoters of coding for everyone often invoke the concept of “ literacy, ” drawing parallels between reading and writing code and reading and writing text. In this book, Annette Vee examines the coding-as-literacy analogy and argues that it can be an apt rhetorical frame. The theoretical tools of literacy help us understand programming beyond a technical level, and in its historical, social, and conceptual contexts. Viewing programming from the perspective of literacy and literacy from the perspective of programming, she argues, shifts our understandings of both. Computer programming becomes part of an array of communication skills important in everyday life, and literacy, augmented by programming, becomes more capacious. Vee examines the ways that programming is linked with literacy in coding literacy campaigns, considering the ideologies that accompany this coupling, and she looks at how both writing and programming encode and distribute information. She explores historical parallels between writing and programming, using the evolution of mass textual literacy to shed light on the trajectory of code from military and government infrastructure to large-scale businesses to personal use. Writing and coding were institutionalized, domesticated, and then established as a basis for literacy. Just as societies demonstrated a “ literate mentality ” regardless of the literate status of individuals, Vee argues, a “ computational mentality ” is now emerging even though coding is still a specialized skill.

The Arapaho Language is the definitive reference grammar of an endangered Algonquian language. Arapaho differs strikingly from other Algonquian languages, making it particularly relevant to the study of historical linguistics and the evolution of grammar. Andrew Cowell and Alonzo Moss Sr. document Arapaho's interesting features, including a pitch-based accent system with no exact Algonquian parallels, radical innovations in the verb system, and complex contrasts between affirmative and non-affirmative statements. Cowell and Moss detail strategies used by speakers of this highly polysynthetic language to form complex words and illustrate how word formation interacts with information structure. They discuss word order and discourse-level features, treat the special features of formal discourse style and traditional narratives, and list gender-specific particles, which are widely used in conversation. Appendices include full sets of inflections for a variety of verbs. Arapaho is spoken primarily in Wyoming, with a few speakers in Oklahoma. The corpus used in The Arapaho Language spans more than a century of documentation, including multiple speakers from Wyoming and Oklahoma, with emphasis on recent recordings from Wyoming. The book cites approximately 2,000 language examples drawn largely from natural discourse - either recorded spoken language or texts written by native speakers. With The Arapaho Language, Cowell and Moss have produced a comprehensive document of a language that, in its departures from its nearest linguistic neighbors, sheds light on the evolution
