The top of David Vizard's notepaper reads: 'Automotive Journalist & Consultant Engineer', an accurate statement of fact but one which tells only part of the story. The words 'leading' and 'brilliant' could easily prefix those two phrases without compromising the honesty of the description, but that's not the Vizard way, I have known David and his work for the past ten years and in that time.

In David Vizard's How to Super Tune and. The Holley carburetor is an icon in the performance industry. Thirty, forty, even fifty years ago, if you looked under the hood of any modified or performance car, you more than likely would discover a Holley carburetor lurking there. Often, many enthusiast's first modification is swapping out the ...

Extracting maximum torque and horsepower from engines is an art as well as a science. David Vizard is an engineer and more aptly an engine building artist who guides the reader through all the aspects of power production and high-performance engine building. His proven high-performance engine building methods and techniques are revealed in this all-new edition of How to Build Horsepower. Vizard goes into extreme depth and detail for drawing maximum performance from any automotive engine. The production of power is covered from the most logical point from the air entering the engine all the way to spent gasses leaving through the exhaust. Explained is how to optimize all the components in between, such as selecting heads for maximum flow or port heads for superior power output, ideal valvetrain components, realizing the ideal rocker arm ratios for a particular application, secrets for selecting the best cam, and giving unique insight into all facets of cam performance. In addition, he covers how to select and setup superchargers, nitrous oxide, ignition and other vital aspects of high-performance engine building.

Author Vizard covers blending the bowls, basic porting procedures, as well as pocket porting, porting the intake runners, and many advanced procedures. Advanced procedures include unshrouding valves and developing the ideal port area and angle.

Renowned engine builder and technical writer David Vizard turns his attention to extracting serious horsepower from small-block Chevy engines while doing it on a budget. Included are details of the desirable factory part numbers, easy do-it-yourself cylinder head modifications, inexpensive but effective aftermarket parts, the best blocks, rotating assembly (cranks, rods, and pistons), camshaft selection, lubrication, induction, ignition, exhaust systems, and more.

In How to Super Tune and Modify Holley Carburetors, best selling author Vizard explains the science, the function, and most importantly, the tuning expertise required to get your Holley carburetor to perform its best for your performance application.

Hundreds of photos, charts, and diagrams guide readers through the rebuilding process of their small-block Chevy engine. Each step, from disassembly and inspection through final assembly and tuning, is presented in an easy-to-read, user-friendly format.

When a body lands on the porch of the legendary Grand Hotel on Mackinac Island, news reporter Nick Steele is pulled into a mysterious death at one of America's great summer resorts. Nick tracks the killer from the magical island through the neighborhoods of Bay City and a Flint auto assembly plant, unlocking the truth behind a horrifying secret of the past.

Small mods and upgrades can result in large performance gains! Acclaimed technical writer David Vizard provides you with the latest technical updates to Carter, Holley, Predator, Weber, Dellorto, and Mikuni carburetors, plus calibration methods, analysis of different designs, mixture ratios and intake combinations.
