Kids love fast food. And the fast food industry definitely loves kids. It couldn ' t survive without them. Did you know that the biggest toy company in the world is McDonald ' s? It ' s true. In fact, one out of every three toys given to a child in the United States each year is from a fast food restaurant. When Eric Schlosser ' s best-selling book, Fast Food Nation, was published for adults in 2001, many called for his groundbreaking insight to be shared with young people. Now Schlosser, along with co-writer Charles Wilson, has investigated the subject further, uncovering new facts children need to know. Creating an environment in which children in the United States grow up healthy should be a high priority for the nation. Yet the prevailing pattern of food and beverage marketing to children in America

represents, at best, a missed opportunity, and at worst, a direct threat to the health prospects of the next generation. Children's dietary and related health patterns are shaped by the interplay of many factors—their biologic affinities, their culture and values, their economic status, their physical and social environments, and their commercial media environments—all of which, apart from their genetic predispositions, have undergone significant transformations during the past three decades. Among these environments, none have more rapidly assumed central socializing roles among children and youth than the media. With the growth in the variety and the penetration of the media have come a parallel growth with their use for marketing, including the marketing of food and beverage products. What impact has food and beverage marketing had on the dietary patterns and health status of American children? The answer to this question has the potential to shape a generation and is the focus of *Food Marketing to Children and Youth*. This book will be of interest to parents, federal and state government agencies, educators and schools, health care professionals, industry companies, industry trade groups, media, and those involved in community and consumer advocacy.

*Supersizing Urban America* reveals how the US government has been, and remains, a major contributor to America's obesity epidemic. Government policies, targeted food industry advertising, and other factors helped create and reinforce fast food consumption in America's urban communities. Historian Chin Jou uncovers how predominantly African-American neighborhoods went from having no fast food chains to being deluged. She lays bare the federal policies that helped to subsidize the expansion of the fast food industry in America's cities and explains how fast food companies have deliberately and relentlessly marketed to urban, African-American consumers. These developments are a significant factor in why Americans, especially those in urban, low-income, minority communities, have become disproportionately affected by the obesity epidemic."

At the turn of the Twentieth Century, the President of the United States is shot by an anarchist. Provocative, edgy, and compelling, the first play by the author of *Fast Food Nation* and *Reefer Madness* is about patriotism, power, the allure of violence.
