Hi. I have a Mercedes OM 904 LA engine powering a Atlas Copco air compressor. As long as I have owned it (6 years) it has had a problem with taking a long time cranking before it actually starts. This cranking may take anything from 10 seconds when already warmed up and just shut down after running for an hour, to 30 seconds when starting from cold. Sometimes if starting from cold on a cold ...

This book covers all aspects of supercharging internal combustion engines. It details charging systems and components, the theoretical basic relations between engines and charging systems, as well as layout and evaluation criteria for best interaction. Coverage also describes recent experiences in design and development of supercharging systems, improved graphical presentations, and most advanced calculation and simulation tools.

When Namita is ten, her mother takes her to Dhondutai, a respected Mumbai music teacher from the great Jaipur Gharana. Dhondutai has dedicated herself to music and her antecedents are rich. She is the only remaining student of the legendary Alladiya Khan, the founder of the gharana and of its most famous singer, the tempestuous songbird, Kesarbai Kerkar. Namita begins to learn singing from Dhondutai, at first reluctantly and then, as the years pass, with growing passion. Dhondutai sees in her a second Kesar, but does Namita have the dedication to give herself up completely to music—or will there always be too many late nights and cigarettes? Beautifully written, full of anecdotes, gossip and legend, *The Music Room* is perhaps the most intimate book to be written about Indian classical music yet.

Beyond Audubon: A quirky, “lively and illuminating” account of bird-watching’s history, including “rivalries, controversies, [and] bad behavior” (*The Washington Post Book World*). From the moment Europeans arrived in North America, they were awestruck by a continent awash with birds—great flocks of wild pigeons, prairies teeming with grouse, woodlands alive with brilliantly colored songbirds. *Of a Feather* traces the colorful origins of American birding: the frontier ornithologists who collected eggs between border skirmishes; the society matrons who organized the first effective conservation movement; and the luminaries with checkered pasts, such as Alexander Wilson (a convicted blackmailer) and the endlessly self-mythologizing John James Audubon. Naturalist Scott Weidensaul also recounts the explosive growth of modern birding that began when an awkward schoolteacher named Roger Tory Peterson published *A Field Guide to the Birds* in 1934. Today, birding counts iPod-wearing teens and obsessive “listers” among its tens of millions of participants, making what was once an eccentric hobby into something so completely mainstream it’s now (almost) cool. This compulsively readable popular history will surely find a roost on every birder’s shelf. “Weidensaul is a charming guide. . . . You don’t have to be a birder to enjoy this look at one of today’s fastest-growing (and increasingly competitive) hobbies.” —*The Arizona Republic*
