The Hands-On! Series is designed with any classroom in mind, aiding teachers and students both in the school environment and the at-home classroom by educating children about the amazing subjects of science, math, art, and nature, and more importantly, giving young learners the tools they need to explore and learn about those subjects on their own. Each project in this book is specifically designed to place the ability to discover in the hands of young minds. Simple text provides an easy-to-follow, step-by-step guide to each project, a brief explanation to why it works, and ideas for further activities. In addition, every single project is accompanied by colorful illustrations and appealing photographs, aimed to enhance children's understanding and engage the reader. Each book in the series also comes equipped with a comprehensive glossary and index, enriching and aiding the learning experience. We are sure our readers will finish these books with a new understanding of each subject matter, and new found abilities to explore and discover their world on their own. Keywords: STEM-Hands-On! Art appreciation, primary and secondary sources, history, biography, tools, mediums; collage, mosaic, 3D, abstract, famous works of art; Landscapes, people, animals, still life, sports and leisure. Text features; gallery, headings, glossary, index, photographs, captions, step by step directions. Lexile: 840L GRL: R

Each easy-to-implement project includes background information for the teacher, project goals, math skills needed, a student guide with tips and strategies, and reproducible worksheets. Projects are designed to help students meet the National Council of Teachers of Mathematics Standards and Focal Points, and chapters are organized to show how math relates to language, arts, science, etc.--demonstrating the importance of math in all areas of real life. In Part I, Chapter 1 offers an overview of how to incorporate math projects in the classroom. Chapter 2 provides a variety of classroom management suggestions, as well as teaching tips, and Chapter 3 offers ways teachers may evaluate project work. Each chapter also contains several reproducibles that are designed to help students master the procedural skills necessary for effective collaboration while working on projects. Part II, "The Projects," is divided into six separate sections: Section 1. Math and Science Section 2. Math and Social Studies Section 3. Math and Language Section 4. Math and Art and Music Section 5. Math and Fun and Recreation Section 6. Math and Life Skills

Gary Robert's name appears first on the earlier edition.

Presents hands-on projects, accompanied by a brief explanation of the scientific reason for why each project works, to help enhance children's understanding of nature, including the weather, seasons, and pond life.

Hands-On Math Projects with Real-Life Applications, Second Edition offers an exciting collection of 60 hands-on projects to help students in grades 6--12 apply math concepts and skills to solving everyday, real-life problems! The book is filled with classroom-tested projects that emphasize: cooperative learning, group sharing, verbalizing concepts and ideas, efficient researching, and writing clearly in mathematics and across other subject areas. Each project achieves the goal of helping to build skills in problem solving, critical thinking, and decision making, and supports an environment in which positive group dynamics flourish. Each of the projects follows the same proven format and includes instructions for the teacher, a Student Guide, and one or more reproducible datasheets and worksheets. They all include the elements needed for a successful individual or group learning experience. The projects are easily implemented and can stand alone, and they can be used with students of various grade levels and abilities. This thoroughly revised edition of the

bestseller includes some new projects, as well as fresh information about technology-based and e-learning strategies and enhancements; No Child Left Behind standards; innovative teaching suggestions with activities, exercises, and standards-based objectives; reading and literacy connections; and guidelines and objectives for group and team-building projects. Hands-On Math Projects with Real-Life Applications is printed in a lay-flat format, for easy photocopying and to help you quickly find appropriate projects to meet the diverse needs of your students, and it includes a special Skills Index that identifies the skills emphasized in each project. This book will save you time and help you instill in your students a genuine appreciation for the world of mathematics. "The projects in this book will enable teachers to broaden their instructional program and provide their students with activities that require the application of math skills to solve real-life problems. This book will help students to realize the relevance and scope of mathematics in their lives."
--Melissa Taylor, middle school mathematics teacher, Point Pleasant Borough, New Jersey

The 64-page Mark Twain Hands-on History Projects Resource Book for grades 5-8 allows students to use hands-on presentations and activities to understand the integration of history and language arts.

Teaching project management is not an easy task. Part of the difficulty is the one-of-a-kind nature of projects. This book and the software that comes with it (Project Team Builder) present a unique approach to the teaching and training of project management – an approach based on a software tool that combines an interactive, dynamic case study and a simple yet effective Project Management System. The book focuses on problems that the project manager faces in planning, monitoring and controlling projects. Together with the software, the book provides the user with the opportunity to experience complex Project Management situations, understand the situation, develop alternative ways to cope with it and select the best alternative based on rigorous analysis. Project Team Builder (PTB), the software that accompanies this book, is web-based, please visit <http://www.sandboxmodel.com>.

Exciting Activities for Young Artists, Scientists and Engineers Spark your curiosity with these fun games and creative projects to learn early concepts in Science, Technology, Engineering, Art and Math. These incredible activities from Andrea Scalzo Yi, creator of Raising Dragons, make learning such a blast, you'll forget you're doing it! Feeling bored on a rainy day? Now you can pick a project, gather your supplies and let the magic happen. Try far-out science experiments like making Shaving Cream Rain Clouds or Lava Lamps. Make math-time snack-time with delicious Cream-Filled Cookie Fractions. Unlock boundless creativity with art projects like Marbled Paper or Monster Bugs. With seasonal activities like the Pool Noodle Obstacle Course and Erupting Pumpkins, there are games to love year-round. Have fun learning early ideas in chemistry, physics, computing, color-mixing and so much more, all while problem-solving and working together with friends. With projects that use common household items and require little adult supervision, 100 Easy STEAM Activities is the ultimate resource for an amazing, creative day of learning.
