`There?s no business like the car business!` Within months of its launch in late 1998, with every well-known global automobile brand jockeying for a foothold in a small-car market almost monopolized by Maruti Udyog Limited, Hyundai Motor India?s debut production, the Santro, emerged as a force to reckon with. The first car to be conceptualized and designed for ? and then developed and manufactured in ? India, the `Sunshine Car? has, over a period of sixteen years, set the record for the quickest small car brand to go from zero to one million units sold. It achieved profitability for Hyundai at an unprecedented speed and made an impressive global impact as a made-in-India automobile in markets as diverse as Algeria and Zimbabwe, Western Europe and North America. In Santro: The Car That Built a Company, BVR Subbu, who spearheaded much of the Santro?s success, reveals the hitherto untold story of how this small car made such a big impact. Vivid anecdotes detail the challenges of introducing a new product in a new market, the canny business strategies that were employed to get the better of rival brands, the unforgettable marketing campaigns that made all the difference ? and the

thrills of the high-stakes power battles and everyday drama that characterize corporate India. By turns revelatory, insightful and delightfully engaging, this is a business story with a difference about a car like no other.

In this book, the authors have gathered and present current research in the study of child nutrition and health from across the globe. Topics discussed include the exposure of Slovenian pre-school children to preservatives and polyphosphates; the breakfast experience in low socio-economic families with overweight children; nutrition in children and adolescents with cancer; calcium supplementation in young children in Asia; early vitamin D supplementation, immune modulation and allergy; and the factors associated with overweight and obesity among Kuwaiti young children.

A story that proves that Indians when empowered can change the course of history. The targets were stupendous and almost unachievable. Slightly over two years to find a suitable partner, finalize all legal documentation, build a factory, create a sales and service network and develop and launch a people's car that would sell 100,000 a year, in a sector where Indian expertise was limited.

In many parts of the world, neoliberalism has not replaced but interacted with national developmentalism in complex and diverse ways. With new constituencies of developmentalism emerging across the globe and with classic developmental political economies restructuring beyond national boundaries, the sociopolitical conditions, processes, and consequences of national development have turned out much more diverse and complex than previously acknowledged. Concurrently, the structural incongruity across various goals of national progress - such as democracy, social equity and integration, and economic development - has become a prevalent phenomenon across the globe. Using case studies that cover both post-ISI, post-socialist, post-developmental statist, and post-liberal instances of neoliberal-era developmental politics during the ascendancy of neoliberalism on the one hand and East and South Asian, Latin American, African, European, and Australian experiences on the other, the contributors critically examine various national configurations of developmental politics in the neoliberal era.

Process broke fresh ground in the understanding of strategy at a time when thinking about strategy was still in its early days, and it has not been displaced since." —David J. Hickson, Emeritus Professor of International Management & Organization, University of Bradford School of Management Originally published in 1978, *Organizational Strategy, Structure, and Process* became an instant classic, as it bridged the formerly separate fields of strategic management and organizational behavior. In this Stanford Business Classics reissue, noted strategy scholar Donald Hambrick provides a new introduction that describes the book's contribution to the field of organization studies. Miles and Snow also contribute new introductory material to update the book's central concepts and themes. *Organizational Strategy, Structure, and Process* focuses on how organizations adapt to their environments. The book introduced a theoretical framework composed of a dynamic adaptive cycle and an empirically based strategy typology showing four different types of adaptation. This framework helped to define subsequent research by other scholars on important topics such as configurational analysis, organizational fit, strategic human resource management, and multi-firm network organizations.
