May I first congratulate, unconditionally, the Association MEDMARAVIS for organizing this symposium and for inviting me re presenting the Sardinian Ministry of the Environment. I would like to assert that such initiatives help a great deal and in a concrete way, Heads of government departments in charge of land use and natural resources. At this first symposium of the Mediterranean Marine Avifauna I must congratulate the scientific faculty for proposing such an ample spectrum of high quality papers dealing with diverse parts of the Mediterranean and beyond. I am sure that their contributions will further scientific research, will help to protect our environment and will lead, more especially, to the management and conservation of seabirds. To know in order to manage has often been said at this symposium. In fact, it is not possible to manage thoughtfully and rationally the natural resources without knowing more profoundly how they function. This reasoning is also valid on a more general scale: regional planning of human activities should not disregard the evaluation of the ecosystem.
