Doing this results in a continuous loop of taking action and feeling motivated, and then taking more action and feeling more motivated. No matter what you’re trying to achieve, if you’re demotivated to do it, it’s because you’re not taking action; and if you’re not taking action, it’s probably because you’re overwhelmed by the size of the task you’ve got in front of you.

Build Network Marketing Leaders Faster! Much Faster! Entire three-book leadership series by Tom "Big Al" Schreiter and Keith Schreiter Book #1: How To Build Network Marketing Leaders Volume One: Step-by-Step Creation of MLM Professionals shows us how to locate the best leader candidates and how to groom them for leadership. Learn exactly what to say and exactly what to do to change their attitudes, their thinking, and their results. Why? Because leaders are everything in network marketing. These are the long-term producers that leverage our income. We have limited time. We can only work with a limited number of distributors. So, we must duplicate ourselves through our leaders. Ask yourself, “Do you want to be a leader? Or, do you want more leaders on your network marketing team?” Everyone says they want to have more leaders, but how? How does one find leaders? How does one create leaders? What are the things we need to teach ordinary distributors to do in order to for them become leaders? This plan doesn't happen by accident. Instead of wishing and hoping for leaders, this book will give you the step-by-step activities to create leaders. Yes, there is a plan for building leaders and it is simple to follow. Discover how to give ordinary distributors a leadership test to determine if they are ready to enter the path of leadership. Then, learn how to start their learning process with the biggest leadership lesson of all: problems. Book #2: How To Build Network Marketing Leaders Volume Two: Activities and Lessons for MLM Leaders takes our potential leaders and expands on what they can do to grow their teams faster. No one is a "natural-born leader." Babies aren't given a manual on how to be an adult. Adulthood is learned from others. So how will we teach eager distributors to become leaders? By showing, participating, experiencing ... and of course, sharing stories. Yes, they could imitate us to become leaders, but not everyone is created the same, with the same set of skills or advantages. So, there must be common lessons everyone can learn for leadership. Inside this book, you will find many ways to change people's viewpoints, to change their beliefs, and to reprogram their actions. And when these three things change, the results will naturally change too. The earnings from developing one good leader could dwarf the monthly payout of almost any retirement plan. Book #3: Motivation. Action. Results. How Network Marketing Leaders Move Their Teams adds another 172 pages of step-by-step actions and campaigns to make our leaders the best they can be. Getting results from the team is the measurement of true leadership. Want to motivate your network marketing team into action? We don't have to be a screaming drill instructor to get the job done. Our understanding of how the human brain operates and completes its essential tasks continues is fundamentally altered from what it was ten years ago. We have moved from an understanding based on the modularity of key structural components and their specialized functions to an almost diametrically opposed, highly integrated neural network model, based on a vertically organized brain dependent on small world hub principles. This new understanding completely changes how we understand essential psychological constructs such as motivation. Network modeling posits that motivation is a construct that describes a modified aspect of the operation of the human learning system that is specifically designed to cause a person to pursue a goal. Anthropologically and developmentally, these goals were initially basic, including things like food, shelter and reproduction. Over the course of time and development they develop into a complex web of extrinsic and then intrinsic goals, objectives and values. The core for all of this development is the inborn flight or fight reaction has been modified over time by a combination of inborn human temperamental characteristics and life experiences. This process of modification is, in part, based on the operation of a network based error-prediction network working in concert with the reward network to produce a system of ever evolving valuations of goals and objectives. These valuations are never truly fixed. They are constantly evolving, being modified and shaped by experience. The error prediction network and learning related networks work in concert with the limbic system to allow affect laden experiences to inform the process of valuation. These networks, operating in concert, produce a cognitive process we call motivation. Like most networks, the motivation system of networks is recruited when the task demands of the situation require them. Understanding motivation from this perspective has profound implications for many scientific disciplines in general and psychology in specific. Psychologically, this new understanding will alter how we understand client behavior in therapy and when being evaluated. This new understanding will provide direction for new therapeutic intervention for a variety of disorders of mental health. It will also inform testing practices concerning the evaluation of effort and malingering. This book is not a project in reductionism. It is the polar opposite. A neural network understanding of the operation of the human brain allows for the integration of what has come before into a comprehensive and integrated model. It will likely provide the basis for future research for years to come.

This is the one thing we can control. - We can change our mindsets in one second. - There is no cost. It's free to do. - The world responds, giving us better results. Instead of letting our mindsets control us, here is our chance to determine our future. Our first surprise is that nature gives us a negative mindset. We have programs that fear everything. Nature wants us to survive. Surviving is good, but achieving is great. And what about others? Can they affect our mindsets? Certainly, if we let them. This book gives us the tools to take control of our minds. Why be victims when we can be victors? Not only can we use these mindset skills for our personal success, but we can also change the mindsets of others. We can put our groups on the path to more positive outcomes and growth. What is magical about changing our mindsets? Other people can detect our mindsets and will react to them. This is how we can affect the outcomes in our lives. So even before we help others change their mindsets, our personal mindsets give us a big head start toward our goals. Why wouldn't we change our mindsets? Because we don't know how. Let's learn the precise skills to make this happen.

Fear? Sweaty palms? Don't know what to say? Afraid of how others will react? Why do we avoid setting appointments? Our self-image says to us, "Don't take a chance." Motivation alone won't fix this. Our minds will come up with excuses not to set the appointment. Our sponsor yells at us, "Face the fear, and the fear will go away." Sounds easy to say, but to do? Not as easy. Appointments are part of our business. We must fix this problem. We will have to make setting appointments enjoyable. Then, our brains will work for us instead of against us. How can we make setting appointments enjoyable? First, we will learn to make appointments a passion, something we look forward to. And second? We will learn the exact words to say to avoid rejection and to reduce tension with our prospects. Let's face it. No one wants to be a pushy salesperson. We want to be a welcome addition to other people's lives. We can do this by following certain principles such as being brief, getting to the point, making it all about our prospects, and presenting our offer as a way of improving their lives. No more fear. No more feeling guilty. Instead, let's turn our negative feelings into positive momentum to get appointments fast. We want to enjoy every moment of our business. Get more appointments now. Order your copy right away.

Not every prospect joins right away. They have to think it over, review the material, or get another opinion. This is frustrating if we are afraid to follow up with prospects. What can we do to make our follow-up efforts effective and rejection-free? How do we maintain posture with skeptical prospects? What can we say to turn simple objections into easy decisions for our prospects? Procrastination stops and fear evaporates when we have the correct follow-up skills. No more dreading the telephone. Prospects will return our telephone calls. And now, we can look forward to easy, bonded conversations with prospects who love us. Prospects want a better life. They are desperately searching for: 1. Someone to follow. 2. Someone who knows where they are going. 3. Someone who has the skills to get there. We have the opportunity to be that guiding light for our prospects. When we give our prospects instant confidence, contacting our prospects again becomes fun, both for the prospects and for us. Don't we both want a pleasant experience? Don't lose all those prospects that didn't join on your first contact. Help reassure them that you and your opportunity can make a difference in their lives. Use the techniques in this book to move your prospects forward from "Not Now" to "Right Now!" Scroll up and order your copy now!
