In reality, all-in-one computers offer a happy medium: compact, visually pleasing packages that still boast the power and convenient screen sizes of desktops. Also, an all-in-one PC will generally cost less than a laptop with comparable specifications. If portability is still essential to you, you might consider an all-in-one desktop with a touch screen that's designed to also function as a very large tablet.

All-In-One vs. Desktop PCs . Buying a desktop offers several advantages over purchasing an all-in-one PC. Many all-in-one PCs feature components designed for laptops including processors, memory, and drives. Such architecture helps make the all-in-one compact, but they also hinder the overall performance of the system.
