Personal independence payment was introduced in 2013 and is gradually replacing disability living allowance for adults under 65. To get it you must complete a detailed questionnaire and, in most cases, undergo a face-to-face assessment. With stricter criteria, it is expected that far fewer people will qualify than for disability living allowance - so it's essential to be well prepared. This guide is for anyone who needs to know about claiming personal independence payment, whether for yourself or someone else. It clearly sets out the process, how you are assessed, and what the qualifying conditions are. It includes dozens of examples illustrating how the rules apply in practice to people with different conditions such as mental health issues or a terminal illness. If you are currently getting disability living allowance, the book explains how you will be affected. It also sets out what happens if you go into hospital or a care home and how personal independence payment can be a 'passport' to other benefits. And it explains what to do if your condition changes, and how to challenge a decision you don't agree with. The authors include key legal sources and a comprehensive index to help you find the information you need.-Back cover.

On 6 December 2010, the Government published Disability Living Allowance reform (Cm 7984, ISBN 9780101798426) which set out its reform proposals and sought people's views. This document outlines the responses received, from both individuals and organisations, and provides further information regarding the replacement of DLA and the introduction of Personal Independence Payment for people of working age (16-64) from 2013/14. The Government will ensure that the new Personal Independence Payment remains a non-mean-tested and non-taxable cash benefit which people can spend in a way that best suits them. The aim, through the introduction of Personal Independence Payment, is to make the benefit fairer, more straightforward to administer, and for it to be easier and clearer to understand. There will be two components of Personal Independence Payment; a daily living component and a mobility component, each with a standard and enhanced rate. The Government is developing the assessment for Personal Independence Payment in collaboration with a group of independent specialists and will consider an individual's ability to carry out key everyday activities. The greatest priority in awarding the benefit will be that it goes to those individuals who are least able to carry them out. The application and administration process will be made as straightforward as possible. The Personal Independence Payment will not be extended to new or existing claims for children from 2013/14. And the proposal to withdraw the DLA mobility component from people in residential care will not now be implemented.

This book offers new direction in disability studies, by integrating the medical and social model of disability. The first aim is to provide an integral approach to thinking about impairment and disability through the integrative lens of being vulnerable. The second aim is to transcend the normative trap which impairment and disability debate finds itself locked in. Disability debate is trapped in a normative struggle to escape oppressive norms. Either, by legitimizing the desire to be free from impairment, where a legitimization identity is promoted through the medical model. Or, by resisting discriminative social norms, where the desire is to be free from oppressive social barriers that exist on top of having impairment. Identifying with one's vulnerability, or embodied uncertainty, allows for the possibility of forging meaning and building new identity. It allows freedom to express embodied difference, rather than to transform or defend it.
