This reference guide provides pilots with a quick and easy access to most points concerning flying in a modern aircraft. The items are listed in alphabetical order and there is a comprehensive index and the most complete list of currently-used aeronautical abbreviations ever published. The book includes everything that a student pilot, a qualified PPL or a career pilot training towards a CPL or IR will need.

Each guide in this comprehensive series covers the fundamentals of flying and the principal characteristics of a specific type of aircraft, gathered from the advice and experiences of leading experts in the aviation industry. Geared for pilots interested in renting or buying a particular model, these sourcebooks provide an overview of the aircraft and detailed descriptions of its handling characteristics, limitations, and performance data. A history of each airplane's use and function is also included.

A vital resource for pilots, instructors, and students, from the most trusted source of aeronautic information.
