which is used in combination with a softbox. He also hangs a silk to filter the ambient light, thus softening the hard sun. Morgan also prefers to blowout the background, resulting in sharp silhouettes.

Professional Black and White Photography Tips
Black and White Photography Tip #1: Shoot in RAW. Many times when I shoot for black and white, the photo just doesn't turn out right when I finally review it on the computer. By shooting in RAW, you'll be able to change your mind later if the photo wasn't as great in black and white as you'd hoped.

15 Tips For Stunning Black and White Photography - Improve ...

Filters Make it Easier. In the game of black and white photography, filters still make a world of difference! The polarizer can be used, unconventionally, to darken the sky, which in B&W creates big-time black drama. The split grad can be used for the same purpose, as you see in this photo of Ausable Chasm in NY.

Read Free Professional Techniques For Black White Digital Photography

Your camera (DSLR or DSLM) most likely allows you the option of shooting both RAW and JPEG images simultaneously. By choosing the setting on your camera for black and white (also called monochrome), the images on your camera's LCD will appear black and white, so you can revise your composition while shooting. In this scenario, you still maintain your color RAW file for processing later on, but can "see" what you will be working with.

How to Achieve Great Black and White Photos in Editing

Read Free Professional Techniques For Black White Digital Photography

Black and white emphasises the shapes of their wings and the textures of the background. Nudes. Nudes are recognised as one of the oldest subjects for artists and photographers. Black and white nudes are timeless, and by removing colour, help elevate the subject matter from something that is potentially smutty by treating the naked body as an art form.

Make the Transition to Black and White ... - Canon Inc.

You can use the standard linear black to white transition (press D in Photoshop first, then add a new gradient map adjustment layer), which gives very similar, but not quite the same, results as desaturation. Gradient maps with a straight gradient tend to result in a higher-contrast image than desaturation.
