## NEW ORLEANS JAZZFEST PRODUCER STABBED! TEENAGE SISTER

MISSING!Everybody loved easygoing Ham Brocato, producer of the famed New Orleans JazzFest. So how did he end up stabbed to death on his kitchen floor?New Orleans Homicide Detective Skip Langdon just happens to be on hand when Ham's body is discovered in the middle of his own party the evening before the Fest. To complicate the already murky case, the victim's sixteen-year-old blues musician sister has disappeared, and Skip suspects that if the young woman isn't the murderer, she's in mortal danger from the person who is. So Task One is finding Melody, ambitious, unhappy at home, and determined to break from her family.In this tale of southern kinships gone awry, she's assisted by her long-distance love, Steve Steinman, and her gay landlord, Jimmy Dee. Meanwhile, Melody's dangerous yet exhilarating journey tugs at the heart and raises the pulse rate.

Allyson Brown---the Girl Gatsby, they called her. A woman of wealth, hostess of fabled parties, patron of the arts, especially of poets. Found floating in her own swimming pool, shot to death. Poet and fledgling detective Talba Wallis gets an urgent call from the sister she barely knows, Janessa. The Girl Gatsby was Janessa's close friend. But this call isn't an invitation to an elegant literary salon. Janessa wants off the hook as the principal murder suspect. Investigating, Talba and her perpetually irascible boss, Eddie, find the reality behind the Gatsby glamour. Allyson Brown was widely hated, a con artist who neglected her children, failed to pay her bills, and lied to everyone. The one person she loved may have ushered her to her death. The case takes Talba and Eddie from literary parties to Gulf Coast bait shops, from biker bars to abandoned wharves, and finally to the story of another Gatsby, which may yield answers, or greater mysteries. Louisiana Lament is Talba's journey through the not-so-genteel Southern literary scene, where backbiting and petty jealousies abound and mint juleps are served with canapés of carnage. At the publisher's request, this title is being sold without Digital Rights Management software (DRM) applied.

Taken literally, the title "All of Statistics" is an exaggeration. But in spirit, the title is apt, as the book does cover a much broader range of topics than a typical introductory book on mathematical statistics. This book is for people who want to learn probability and statistics quickly. It is suitable for graduate or advanced undergraduate students in computer science, mathematics, statistics, and related disciplines. The book includes modern topics like non-parametric curve estimation, bootstrapping, and classification, topics that are usually relegated to follow-up courses. The reader is presumed to know calculus and a little linear algebra. No previous knowledge of probability and statistics is required. Statistics, data mining, and machine learning are all concerned with collecting and analysing data.

Comedy legend Johnny Leland has called in his chips. He's organizing a charity telethon and needs TV cop Richard Belzer to cohost. Not one to let down an old friend -- much less the guy who gave him his start in stand-up comedy -- The Belz gets ready to head out to Las Vegas for the headlining event when he receives a mysterious phone call. Twenty-six years ago, beautiful starlet Bridget Burgeon was found dead in her Hollywood apartment. Sleeping pills, the coroner ruled, but many questioned whether her relationship with handsome, up-and-coming California congressman Mark Kaye played a role. Kaye's death in a tragic auto accident put an end to any investigation but not to the speculation. Conspiracy theorists have been working overtime ever since, and Paul Venchus, an old newspaper colleague whom Richard hasn't seen in thirty years, claims to have made a breakthrough in the case. A well-known conspiracy theorist himself, The Belz can't resist hearing him out and agrees to meet.

When Venchus turns up dead and a wacky, self-proclaimed female psychic shows up at his hotel in Vegas insisting that Belzer continue their investigation, he reluctantly relents. Relying on The Belz's TV cop know-how and celebrity status, they begin to piece together a series of mysterious deaths that, while rooted a quarter of a century in the past, present some very real dangers in the present. As the bodies start piling up, Belzer finds a legendary hit man hot on his trail and must utilize all of his talents not only to pull off a successful telethon but to solve one of our history's most scandalous conspiracies before his Vegas stint becomes his closing act.

"Julie Smith not only firmly establishes her claim to the New Orleans crime scene, but she explores an intriguing new franchise for the serial killer." Sue Grafton For detective Skip Langdon, the murder of a multiple self-help group member is no fun. Even if the guilty character is claiming the mantle last held by the Axeman, a notorious New Orleans serial killer of seventy years ago. Yet as Skip threads her fascinated way from one self-help group to another, she finds she has more in common with the twelve-steppers than just the murder. And she knows what they do not: that among their anonymous numbers is a deadly murderous, and dangerously attractive -- psychopath.... From the Paperback edition.

Published by the American Geophysical Union as part of the Coastal and Estuarine Studies, Volume 61. The effects of increased atmospheric carbon dioxide and related climate change on shallow coral reefs are gaining considerable attention for scientific and economic reasons worldwide. Although increased scientific research has improved our understanding of the response of coral reefs to climate change, we still lack key information that can help guide reef management. Research and monitoring of coral reef ecosystems over the past few decades have documented two major threats related to increasing concentrations of atmospheric CO<sub>2</sub>: (1) increased sea surface temperatures and (2) increased seawater acidity (lower pH). Higher atmospheric CO<sub>2</sub> levels have resulted in rising sea surface temperatures and proven to be an acute threat to corals and other reef-dwelling organisms. Short periods (days) of elevated sea surface temperatures by as little as 1–2°C above the normal maximum temperature has led to more frequent and more widespread episodes of coral bleaching—the expulsion of symbiotic algae. A more chronic consequence of increasing atmospheric CO<sub>2</sub> is the lowering of pH of surface waters, which affects the rate at which corals and other reef organisms secrete and build their calcium carbonate skeletons. Average pH of the surface ocean has already decreased by an estimated 0.1 unit since preindustrial times, and will continue to decline in concert with rising atmospheric CO<sub>2</sub>. These climate-related Stressors combined with other direct anthropogenic assaults, such as overfishing and pollution, weaken reef organisms and increase their susceptibility to disease.

Talba Wallis--fledgling African-American private detective, poet laureate, and leader of New Orleans's caFT society--is hired by veteran sleuth Eddie Valentino to find a dangerous lothario who seduces teenage black girls who then mysteriously vanish. Reprint.

Making Social Science Matter presents an exciting new approach to the social and behavioral sciences including theoretical argument, methodological guidelines, and examples of practical application. Why has social science failed in attempts to emulate natural science and produce normal theory? Bent Flyvbjerg argues that the strength of social sciences lies in its rich, reflexive analysis of values and power, essential to the social and economic development of any society. Richly informed, powerfully argued, and clearly written, this book opens up a new future for the social sciences. Its empowering message will make it required reading for students and academics across the social and behavioral sciences.

Harry Morgan sees an old flame while driving home after taking his grandson to school. After thirty years since their romantic affair, they steadily renew a once passionate relationship. But after so many years alone, can they forfeit their independence at the cost of a new relationship? They are older, wiser, and they battle to find a compromise as feelings intensify and their interaction becomes ever hotter. A romantic tale that delves into the psychological effects of an affair in later life and story which many over forties will recognise as being very real.
