Anyone who is touched by public education – teachers, administrators,

It will speak to educators, policymakers and citizens who are concerned about the future of education and its relation to a robust, participatory democracy. The

perspectives offered by a wonderfully diverse collection of contributors provide a glimpse into the complex, multilayered factors that shape, and are shaped by, education institutions today. The analyses presented in this text are critical of how globalization and neoliberalism exert increasing

have been hoping for. Addressing systemic inequities embedded within neoliberalism, Carr and Porfilio argue, is key to achieving the hope so brilliantly presented by Obama during the campaign that brought him to the presidency.
