"Money making is not a serious business. It is a game that you play. At first it may seem that it is a game that you play with forces outside yourself--the economies of the market place so to speak--but as you proceed you discover it is actually a game you play with yourself."--Stuart Wilde. Stuart Wilde's money book, his fifth work, deals with the E.S.P. of easy money and the art of being in the right place at the right time, with the right idea and the right attitude. Like his other highly successful books, this work is full of useful information. His breezy and comical style make for effortless reading, as you plot your path to complete financial freedom.

'Hugely enjoyable' - Observer 'Spectacular' - Aaron Brown, author of The Poker Face of Wall Street Some people can make money. Other people can't. It's a thought that makes William Leith wake up in a cold sweat. He doesn't know why it makes him feel anxious. After all, money isn't real. We created it. Humans did. It's our masterpiece. But the desire for it is killing us. It is this dilemma that sets William Leith off on an adventure into the bizarre, morally dubious, yet highly desirable world of the mega-rich. He spends a day with the real-life Wolf of Wall Street who, not content with his hundreds of millions, devised a fraud so he could make hundreds of millions more. He visits a Baroque mansion where a Russian half-billionaire lives alone with his butler. He tours the estate of Felix Dennis, the maverick tycoon who commissioned an avenue of statues to tell the story of his life. He flies to private islands on private jets, meets private men in private clubs, experiencing the dizzy highs of a life without limits - but all it does is give him crippling anxiety. Throughout it all he asks himself: what makes these people wealthy? And how come I'm not?

The co-host of the popular NPR podcast Planet Money provides a well-researched, entertaining, somewhat irreverent look at how money is a made-up thing that has evolved over time to suit humanity's changing needs. Money only works because we all agree to believe in it. In Money, Jacob Goldstein shows how money is a useful fiction that has shaped societies for thousands of years, from the rise of coins in ancient Greece to the first stock market in Amsterdam to the emergence of shadow banking in the 21st century. At the heart of the story are the fringe thinkers and world leaders who reimagined money. Kublai Khan, the Mongol emperor, created paper money backed by nothing, centuries before it appeared in the west. John Law, a professional gambler and convicted murderer, brought modern money to France (and destroyed the country's economy). The cypherpunks, a group of radical libertarian computer programmers, paved the way for bitcoin. One thing they all realized: what counts as money (and what doesn't) is the result of choices we make, and those choices have a profound effect on who gets more stuff and who gets less, who gets to take risks when times are good, and who gets screwed when things go bad. Lively, accessible, and full of interesting details (like the 43-pound copper coins that 17th-century Swedes carried strapped to their backs), Money is the story of the choices that gave us money as we know it today.

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money--investing, personal finance, and business decisions--is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In The Psychology of Money, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

Teaches you the art of being in the right place at the right time, with the right idea and the right attitude.

A novel that touches the deep emotional chords within the reader. The narrative denounces capitalism and relates the struggle of two workers who have set out to defeat their poverty. It is an indictment on religious authority and the elite that enslaves the majority. An engrossing and thought-provoking book that highlights the bright-side of Socialism.

What exactly is it that enables us to live as we do today? Is it that we work harder? Or, that we have more money? The simple truth is that we can live differently from how we lived a hundred years ago and a thousand years ago because of the accumulated sum of new ideas encapsulated in new technology. Money is in this sense only one small part of new technology, the myriad of ideas and inventions that support our way of living today. Why then are most solutions and even problems formulated in terms where "money" is essential? It is because it is the way we have been taught to think. Concepts used in economics, often grossly misinterpreted, have become our prison leading us into a very inhumane world. And we do not even see the prison bars that confines us to certain solutions because we think this is just how it must be. We think it is established science. And because we do not even see the prison bars we become our own wardens. We have thus been beguiled by economists to think that money is wealth and this creates an inhumane world. Instead we should focus on ideas and our true needs as the source of creating true wealth. But if we are to get away from the present focus on money and speculation to get more money we must change how we think and for that we need new ideas, concepts and models. However, new ways of thinking about economic matters will not come from the economists or the greedy rich. They simply have too much to loose. Economists would loose a lot of prestige or even their jobs and the rich would loose the easy ways they have invented to become rich by creating bubble money. We need new ways of viewing what is true wealth and how such is created. This way, and only this way, can we break free from the prison of economic thoughts that today dominate us. By applying his long experience in modeling the author shows alternate ways of viewing wealth, true wealth, based on modern research and sound principles of modeling. And that is thus what this book is all about. This book contain some mathematics. If you prefer a book without mathematical expressions, I recommend my book A New Monetary System.

P. T. Barnum, the great American showman of the 19th century, wrote this short book about making and keeping money. He certainly had life experiences that qualify him for the subject--he started a small newspaper in his twenties, bought and transformed a museum into a showplace for curiosities, built a circus empire that gave performances in America and Europe, promoted a performing tour of a singer, fell into debt in the 1850s and pulled himself out by lecture tours, was a mayor, and founded a hospital. Excerpts: "Those who really desire to attain an independence, have only to set their minds upon it, and adopt the proper means, as they do in regard to any other object which they wish to accomplish, and the thing is easily done. But however easy it may be found to make money, I have no doubt many of my hearers will agree it is the most difficult thing in the world to keep it. ... True economy consists in always making the income exceed the out-go." "Unless a man enters upon the vocation intended for him by nature, and best suited to his peculiar genius, he cannot succeed. I am glad to believe that the majority of persons do find their right vocation. Yet we see many who have mistaken their calling..." His advice is indicated by the chapter titles: DON'T MISTAKE YOUR VOCATION, SELECT THE RIGHT LOCATION, AVOID DEBT, PERSEVERE, WHATEVER YOU DO, DO IT WITH ALL YOUR MIGHT, USE THE BEST TOOLS, DON'T GET ABOVE YOUR BUSINESS, LEARN SOMETHING USEFUL, LET HOPE PREDOMINATE, BUT BE NOT TOO VISIONARY, DO NOT SCATTER YOUR POWERS, BE SYSTEMATIC, READ THE NEWSPAPERS, BEWARE OF "OUTSIDE OPERATIONS", DON'T INDORSE WITHOUT SECURITY, ADVERTISE YOUR BUSINESS, "DON'T READ THE OTHER SIDE", BE POLITE AND KIND TO YOUR CUSTOMERS, BE CHARITABLE, DON'T BLAB, PRESERVE YOUR INTEGRITY.
