The "social licence to operate" began as a metaphor to bring attention to the need for companies to earn acceptance from their host communities. Today, it is a necessary management framework for complex times. A social licence strategy is essentially a stakeholder engagement strategy for navigating complex socio-political environments. This book provides the framework, tools and case studies

a company needs to create a foundation for truly sustainable community development. This 90-minute guide will enable you to: define the social licence to operate; make the business case for actively managing your social licence to operate; measure the social licence to operate; develop a step-by-step plan to restore, build, maintain and enhance your company's social licence; and report on your social licence. This book is for managers in any company facing rising social scrutiny due to unwanted social or environmental impacts. You may be working in natural resources, renewable energy, oil and gas, forestry, construction, manufacturing, retail, food processing, pharmaceuticals or any industry that is facing rising stakeholder expectations and increasing criticism.

We are no longer an economy of products and services. The digital transformation demands that we focus our attention on experiences and outcomes. Business leaders and their organizations must shift to keeping promises—no matter how their customers interact with them. But organizations no longer control the conversation. In this era of social and mobile technology, customers, employees, suppliers, and partners are in direct communication with one another. Those personal

networks and the brands they're passionate about influence their decision making and their spending. The workforce has changed too. Employees expect to be able to determine when and how they will work, the technology they'll use, and the values their company will espouse. Organizations can take part in this conversation only if they recognize how and where it's happening. Resisting these changes will leave executives, managers, and their companies powerless. Organizations must pivot with and ahead of these social, organizational, and technological shifts or risk being left behind. Technology guru Ray Wang shows how organizations can surf the waves of change—how they can keep their promises. Current trends, when taken seriously, require a new way of thinking about business that includes five key areas: 1. Consumerization of technology and the new C-suite 2. Data's influence in driving decisions 3. Digital marketing transformation 4. The future of work 5. Matrix commerce Digital disruption has changed how we do our work. But by mastering these trends you'll delight your customers with every interaction.

This team presents a four-phase model of transformation that shows you step-by-step how to make meaningful progress in contributing to the performance of your company by redesigning HR to work as a strategic partnership.

This open access book presents a picture of the current energy challenges on the African continent (and the Sub-Saharan region in particular) and proposes pathways to an accelerated energy transition. Starting with an analysis of the status quo and the outlook for Africa's energy demand and energy access, it provides an account of the available resources, including hydrocarbons and renewable energy resources, which are playing an increasingly crucial role. It then moves on to analyze the level of investment required to scale-up Africa's energy systems, shedding light on the key barriers and elaborating on potential solutions. It also provides a suggestion for improving the effectiveness of EU-Africa cooperation. While mainly
