Nick Twisp, a dark and precocious fourteen-year-old, struggles with the problems of contemporary teens, including high school, divorced parents, paranoia, his virginity, homelessness, and the attentions of a young lady.

Recently, American youth have demonstrated en masse about a variety of issues ranging from economic injustice and massive inequality to drastic cuts in education and public services. Youth in Revolt chronicles the escalating backlash against dissent and peaceful protest while exposing a lack of governmental concern for society's most vulnerable populations. Henry Giroux carefully documents a wide range of phenomena, from pervasive violent imagery in our popular culture to educational racism, censorship, and the growing economic inequality we face. He challenges the reader to consider the hope for democratic renewal embodied by Occupy Wall Street and other emerging movements. Encouraging a capacity for critical thought, compassion, and informed judgment, Giroux's analysis allows us to rethink the very nature of what democracy means and what it might look like in the United States and beyond.

In the early years of the Republic, as Americans tried to determine what it meant to be an American, they also wondered what it meant to be an American child. A defensive, even fearful, approach to childhood gave way to a more optimistic campaign to integrate young Americans into the Republican experiment. In Children and Youth in a New Nation, historians unearth the experiences of and attitudes about children and youth during the decades following the American Revolution. Beginning with the revolution itself, the contributors explore a broad range of topics, from the ways in which American children and youth participated in and learned from the revolt and its aftermaths, to developing notions of "ideal" childhoods as they were imagined by new religious denominations and competing ethnic groups, to the struggle by educators over how the society that came out of the Revolution could best be served by its educational systems. The volume concludes by foreshadowing future "child-saving" efforts by reformers committed to constructing adequate systems of public health and child welfare institutions. Rooted in the historical literature and primary sources, Children and Youth in a New Nation is a key resource in our understanding of origins of modern ideas about children and youth and the conflation of national purpose and ideas related to child development.

A novel in which a renegade academic and punk intellectual known only as X acts alone to eliminate an infamous Holocaust denier. "I understand that you regard the film Schindler's List as a total lie, as Zionist propaganda." Zundel clears his throat, preparing the posture of his body to pontificate, to deliver a speech he has obviously memorized for use at a hate rally: "Spielberg's movie is a perfect example of Hollywood hate propaganda..."--from Lost Between the Edges In Eldon Garnet's Lost Between the Edges, a feverish intellectual, frustrated by the failures of government, acts alone to eliminate an infamous Holocaust denier. The protagonist, a renegade academic and punk intellectual known only as X, puts his radical ideas into action by firebombing the headquarters of Ernst Zundel, publisher of Did Six Million Really Die? With its incisive critique and its use of real documentation, Lost Between the Edges blurs the boundaries between fact and fiction. Garnet, like W. G. Sebald before him, uses factual documentation of dubious authenticity to construct his narrative. But as the novel progresses, its story becomes so powerful that we find its truth lies not in its factual trappings but in the emotional and intellectual reality of its expression. Garnet reveals the illusory nature of facts, showing not only how they dazzle but also how they destroy. Lost Between the Edges captures the energy and verve of youth in revolt, fired by rage and ideas. Garnet's book will be hailed as a new classic of symbolic warfare waged in the street and the mind.

During the early 1980s, large parts of Europe were swept with riots and youth revolts. Radicalised young people occupied buildings and clashed with the police in cities such as Zurich, Berlin and Amsterdam, while in Great Britain and France, 'migrant' youths protested fiercely against their underprivileged position and police brutality. Was there a link between the youth revolts in different European cities, and if so, how were they connected and how did they influence each other? These questions are central in this volume. This book covers case studies from countries in both Eastern and Western Europe and focuses not only on political movements such as squatting, but also on political subcultures such as punk, as well as the interaction between them. In doing so, it is the first historical collection with a transnational and interdisciplinary perspective on youth, youth revolts and social movements in the 1980s.

Youth, Identity, Power is a unique exploration of the origins and development of Chicano radicalism in America.

Activists, policymakers, and scholars in the US have called for policy reform and evidence-based efforts to decrease the number of people in jail and prison, improve hostile police–community relations, and rollback the "tough on crime" movement. Given that poor people, particularly poor people of color, make up the majority of those under carceral control in Western, industrial countries, can technical solutions, gradual reforms, and individual-level programming genuinely change the deeply entrenched carceral state that has been expanding in the US for over 40 years? In this book, the authors offer an examination of the creative ideas that twelve US-based social justice organizations put forward for how participation in social change might spur not only individual-level change in young people, but community-wide mobilization against the harms resulting from the "tough on crime" movement and neoliberal policy. Using alternative programs grounded in political and social consciousness-raising, these organizations provide important and novel methods for how we might roll back carceral expansion. Their approaches resonate with scholarship in criminology and related fields; however, they sharply contrast with popular notions of "what works". The authors detail how community-based organizations must navigate not only these scientific forces, but the bureaucratic and financial ones consistent with neoliberal governance as well as the more formidable, less navigable political barriers that activate when organizations mobilize young people of color for social and carceral reform. While aware of the formidable barriers they face, the authors highlight the emancipatory potential of community-based social justice organizations working with the most marginalized young people across several major US cities. Written in an accessible way, this book will be of interest to scholars, students, progressive policymakers, practitioners, and activists and their allies who are deeply troubled by the class and racial disparities that pervade the carceral state.
